NOTE ON COVID-19: Since 23rd March 2020, all DIOHAS meetings will take place over video conference.

Speaker

Presentation Title: CDM 20:20 Vision

Background:

Since 2015, Construction Industry Council's (CIC) Health & Safety Champion has chaired its Health & Safety committee and Construction Industry Advisory Committee's (CONIAC), Keeping Pace With Change (KPWC) working group, leading to the production of a number of important reports relating to CDM. This latest report "CDM 20-20 vision-changing the culture", launched on 27th April 2021 by CIC sets out the management arrangements for a range of projects, from small domestic building schemes to major infrastructure programmes, which are practical and CDM compliant.

To view the full report please click the link below:

Guest speakers:

Gary Mees is past President of the Chartered Institute of Architectural Technology and is CIC Health & Safety Champion, he is also a member of CONIAC, chairing their "Keeping Pace With Change" Working group. Having worked in the built environment for 49 years, Gary developed his knowledge and skills base, whilst working on a diverse range of projects ranging in value between £19m to £5k, firstly working for a major contractor, followed by working up to associate level for leading Edinburgh and Glasgow architectural practices. He has also worked for a semi-local government (Scottish Special Housing Association & Scottish Homes). In 2001, Gary formed gmat (Gary Mees Architectural Technology), as the principal of a Registered Chartered Architectural Technologist Practice. Gary is a Chartered Architectural Technologist; Approved Certifier of Design [Energy – 6 Domestic] and an Incorporated member of the Association for Project Safety.

Tony Putsman BSc (Hons), MICE, C Eng is a chartered civil engineer with 40 years construction experience. He has managed a variety of projects in the UK and Africa, including water supply, highway, industrial and residential schemes. A leading advocate of team-based risk management, he now acts as an independent risk management consultant and is a founder-director of Construction Team Technologies Ltd. Tony is the author of "Teamwork not Paperwork- a practical guide to using CDM 2007 to deliver better projects" and co-author of "Practical Guide to Using the CDM Regulations 2015".
